Start working in Slack today

If you've ever written an email, you can write a Slack message even more easily. In Slack, there are two types of messages: direct messages and channel messages. Here's the difference:

Direct messages are private conversations between you and one or a few colleagues.

Channel messages are for public discussions, such as telling everyone in your #project-website channel about a new employee. And don't worry about typos: you can edit your message at any time.
